

SUPPLEMENTAL AMENDMENT

IN THE CLAIMS

Please add new independent claims 16 and 17 as follows:

New Claim 16

- -- 16 A method for refolding a single chain antibody comprising:
- 1) preparing microorganisms expressing the single chain antibody.
- 2) preparing from the microorganisms an extract comprising the single chain antibody, the extract being prepared in a buffer with a final concentration of about 7 molar urea and 5 to 200 micromolar cupric sulfate,
- 3) incubating the extract overnight, and
- 4) exchanging the incubated extract into a buffer without urea.

-New-Claim-17

- -- 17 A method for refolding a single chain antibody comprising
- 1) preparing microofganisms expressing the single chain antibody,
- 2) preparing from the microorganisms an extract comprising the single chain antibody, the extract being prepared in a buffer with a final concentration of about 7 molar urea and 5 to 200
